

UDA DREAM MAKERS

In order to give yourself the best opportunity to find the perfect employer and career fit, it is important to take the time to think through these questions and envision what you want out of your future. This is not an easy process and UDA will be there to support you and work with you as you give yourself the best possibility for success.

We suggest beginning a Word Document or Google Doc to flesh out your responses and save them to return to at a later date. Keep in mind this information may be useful to include in future resumes or personal statements.

Your answers will be used to create your own personalized online portfolio where Dream Maker Companies will be able to view your profile and connect with you for future job opportunities.
